Unmount Windows drive automatically during OS X boot up (or make it not mount at all)

Beitrag von „6fehler“ vom 4. Februar 2015, 14:00

okay, so we have to write a new fstab like this:

Code

1. `sudo nano /etc/fstab`

and paste this line in the newly created fstab

Code

1. `/dev/disk1s1 none ntfs ro,noauto`

When you are done press Control + X to exit and press "Y" to say "yes" to save changes, then hit return to save.
