El Capitan GM post-install questions [English]

Beitrag von „MacGrummel“ vom 16. September 2015, 22:22

Is it just now starting like the first picture?? After all Ozmosis/Clover/Ozmosis-going and changes?

The EFI with only EFI/APPLE and EFI/Oz is NOT the Clover one! The Clover EFI includes several hidden files like .fsevents, .Spotlight-V100, .TemporaryItems and .Trashes, a file named boot and an EFI-folder including APPLE, BOOT, CLOVER and the Clover_Install_Log.txt. The APPLE-Folder includes (Apples) Extensions, the BOOT-folder a BOOTIA32.efi and a BOOTX64.efi-file. All other Clover files are at the Efi inside EFI/EFI/CLOVER-folder.
