Erledigt El Capitan GM post-install questions [English]

Beitrag von „neoyoli" vom 17. September 2015, 02:14

Sorry, I didn't understand your question... Could you rephrase it?

I guess I was stupid making this topic, but I thought once I created a Clover EFI for the USB installer, Clover gets installed with OS X automatically...

So, is it going to work if I just post-install Clover like this?
