## Snow Leopard Install DVD/ WLAN Problem

Beitrag von „Arsakuni“ vom 4. Oktober 2015, 08:50

Mit S hat es nicht vervollständigt.

Habe ich die zweite Variante korrekt eingegeben?

Ich Boote noch mit der CD.

The screenshot shows a Mac OS X desktop with a Terminal window open. The window title is "Terminal — bash — 80x24". The terminal output shows the user 'arams' logging in on Sun Oct 4 08:39:24. The user runs 'diskutil list', which displays the following information:

| #: | TYPE                  | NAME         | SIZE      | IDENTIFIER |
|----|-----------------------|--------------|-----------|------------|
| 0: | GUID_partition_scheme |              | *256.1 GB | disk0      |
| 1: | EFI                   |              | 209.7 MB  | disk0s1    |
| 2: | Apple_HFS             | Snow Leopard | 255.7 GB  | disk0s2    |

| #: | TYPE                   | NAME                 | SIZE     | IDENTIFIER |
|----|------------------------|----------------------|----------|------------|
| 0: | Apple_partition_scheme |                      | *8.1 GB  | disk1      |
| 1: | Apple_partition_map    |                      | 30.7 KB  | disk1s1    |
| 2: | Apple_Driver_ATAPI     |                      | 827.5 MB | disk1s2    |
| 3: | Apple_HFS              | Mac OS X Install DVD | 7.3 GB   | disk1s3    |

The user then runs 'sudo touch /snow leopard/library', which fails with the message 'touch: leopard/library: No such file or directory'.
