OZMOSIS REQUEST THREAD / Ozmosis Anfragen [1. Beitrag beachten!]

Beitrag von „crusher“ vom 21. Februar 2016, 14:00

Mount ESP and go to EFI/Oz/Darwin/Extensions/common here put your network kext and your Sound kexts put in S/L/E.

DSDT and SSDT put in EFI/Oz/Acpi/Load

Audio: [AppleHDA für ALC892 ink. HDAEnabler 1](#)

Network: [RealtekRTL8111.kext.zip](#)

For Audio kext use kext wizard app

Disable Nvidia Injection-> open terminal and put this command

Code

```
1. sudo NVRAM 1F8E0C02-58A9-4E34-AE22-2B63745FA101:DisableNvidiaInjection=%01
```

But dont touch it. GT640 work without this command.
