DSDT fix Z87MX-D3H (OZ167X)

Beitrag von „Huberer“ vom 25. Februar 2016, 23:35

For sound just buy a cheap and good usb soundcard and you will be happy.
For shutdown just see my post above yours.

Edit: another DSDT with a possible shutdown fix. Please try and give feedback (still with the missing usb3.0 port - this can be solved easily)
