`Erledigt` DSDT fix Z87MX-D3H (OZ167X)

Beitrag von „nikoZ" vom 26. Februar 2016, 16:08

DSDT_1: Wake from sleep with USB plugged / OK but it gives me "Disk Not ejected properly" at the wake. Conclusion: It stays down at sleep and shutdown.
Shutdown with USB plugged / OK
After Wake from sleep I loose sound, with original dsdt from forum DB i don't loose it.

DSDT_2: Wake from sleep with USB plugged / OK but it gives me "Disk Not ejected properly" at the wake. Conclusion: It stays down at sleep and shutdown.
Shutdown with USB plugged / OK
~~After Wake from sleep I loose sound, with original dsdt from forum DB i don't loose it.~~ Tried even with latest dsdt uploaded by you last night and sound was good after sleep. no loosing.

I attached DSDT from latest bios uploaded into DB forum for coparision.
