Tool um Ozmosis-Parameter auszulesen/manipulieren

Beitrag von „crusher“ vom 3. März 2016, 12:02

Yes I see. This is good next step. Corection after export he change in Defaults schedule and numbers eg

Code

1. `<key>FirmwareFeatures</key>`
2. `<integer>0x80001417</integer>`
3. `<key>FirmwareFeaturesMask</key>`
4. `<integer>0xC003ff37</integer>`
5. `<key>FirmwareRevision</key>`
6. `<integer>0x0001000A</integer>`

he change to

Code

1. `<key>FirmwareFeatures</key>`
2. `<integer>2147488791</integer>`
3. `<key>FirmwareFeaturesMask</key>`
4. `<integer>201342967</integer>`
5. `<key>FirmwareRevision</key>`
6. `<integer>65546</integer>`
