Suche: AppleHDA (v274.7) gepacht für RealtecALC1150 - GA-Z97X-UD3H

Beitrag von „Ghostbuster“ vom 27. März 2016, 12:52

the applealc don't work correct with oz only by clover!

[crusher](#): my applealc don't load in clover/kext as injection, but if i copy them to s/l/e everything is fine:)

now i use the applehda vanilla version unpatched and just load applealc, nice work!
