Bluetooth 4.0 on the Mavericks 10.9.5

Beitrag von „Sofista“ vom 10. Juli 2016, 18:40

I have a USB 4.0 Bluetooth adapter that works natively in Yosemite and El Capitan ... but the Mavericks until he gets to work the first time ... but after removing the USB Adapter 4.0 .. it does not work properly ... it visualizes my nokia 110 with another name and can not disable bluetooth 4.0 .. how to solve it?
