## **Enabling audio packs Sierra**

**Beitrag von „al6042“ vom 23. Juli 2016, 15:27**

There is no need for a tutorial with pics, since the Steps are explained in here -> [Enabling audio packs Sierra](#)

The only thing that should be added is the info from [@griven](#), to add the "-alcbeta"-flag to your boot arguments, but that is something which would be done in clover, like any other boot-arg...
