MSI GE70 2PC Apache - DSDT/SSDT - Hilfe

Beitrag von „al6042“ vom 27. Juli 2016, 21:52

Hi and welcome to our forum... 😊

If you have the complete same machine, the DSDT should work for you too.

For using the [AppleALC.kext](#) you have to make sure that all Clover KextToPatch entries for AppleHDA are either disabled or deleted.

Any other Audio related kext, which is not the original AppleHDA in /System/Library/Extensions must also be deleted.

After Deletion, don't forget to repair the Kext permissions and rebuild the Kext cache... both can be done by just running the app "[Kext Utility](#)"...

Good Luck
