

Erledigt X99 / 6900K

Beitrag von „giacomoleopardo“ vom 7. August 2016, 17:47

Thanks Zebulon! Any chance for you to update somewhere the two next folders?

EDIT: My problem is way before graphics. Clover seems not to recognize my cpu 6900k. I'm curious about JoeHidden's EFI folder too, since he has my same setup (motherboard and cpu).

[JoeHidden](#): Can you upload EFI folder and your bios profile? To save a bios profile, insert a FAT formatted usb drive, enter bios (Del) go to Tool\ASUS Overclocking Profile select "Load/Save Profile from/to USB Drive", press F2, insert the name of your profile and select OK. Your_BiosProfile.CMO will be saved on the USB flash Drive. Thanks in advance.

PS: which bios version are you using?
