Erledigt Problem MSI Z87 G43 Gaming

Beitrag von „Cuccheis" vom 25. August 2016, 16:07

Just tried with the 1669m version .. same results ! sometimes it reboot sometimes the led on usb key go off and i stuck on apple logo .. my keyboard is logitech k400 and i don't get verbose mode while pressing cmd (windows botton) + v ..
In BIOS i tried to disable vd-tech and virtualization technology .. but same result every time stuck on logo or reboot
now i'm trying to create an yosemite usb installer for try with yosemite .. but install el capitan would be better
