## Ozmosis für Skylake

**Beitrag von „lovemyimac78“ vom 15. September 2016, 03:07**

[Quote = 'Fredde2209', 'https: //www.hackintosh-forum.de/index.php/Thread/25199-Ozmosis-für-Skylake/ postID = 257378 # post257378'] But NVRAM reset but if the monitor suddenly becomes red, then yellow, then green or so, and then restarts. Or not?? This makes the if Ozmosis is added automatically. [/ Quote]

hi Freddie2209 have the OZ folder placed in EFI/ESP? also for ozmosis to boot corectly you need to have ozmosis default plist in oz folder by using e.g plist editor pro (other editors are avilable) compare your ozmosis defaults.plist with your config plist from clover and just add the entrys that are missing into defaults plist
