New Flags in Clover Configurator

Beitrag von „Sofista“ vom 11. Oktober 2016, 04:37

The new Clover Configurator 4.33.0 brings new flags intended for MacOS Sierra not discovered its meaning.

Could someone explain?

-gus_nosleep

-gux_nomsi

nv_spanmodepolicy = 1

keepsyms = 1

kextlog = 0xffff

-alcoff

-shikioff
