Erledigt AMD mac OS 10.11.4 sound card (with the VoodooHDA) help

Beitrag von „griven" vom 15. Dezember 2016, 23:45

Should work with AppleALC.kext and vanilla AppleHDA in /S/L/E.

For ALC887 CodecID 5 should be set in order to make it work. You´ll need to patch your DSDT in order to make it work. If you´re not sure how it has to be done download and install MacIASL and open it up. It should open up with your current DSDT loaded (if not head over to head over to Files in the top Menu Bar and select new from ACPI and in the upcoming Menu choose dsdt). Once opened again head over to Files and select Save as und save your DSDT als decompiled ASL File and upload it here so we can take care of it 😆
