Ozmosis can not load any files in the Oz directory

Beitrag von „griven“ vom 15. April 2017, 14:24

Why Clover if you use OZ? Here is a patched DSDT with LayoutID set to LayoutID1: [DSDT.aml](#) place it on your EFI Partition under Efi/Oz/Acpi/Load also place AppleALC-OZM.kext taken from here [AppleALC - der dynamische AppleHDA Patcher - immer aktuell](#) and Lilu.kext taken from here: [Lilu - Generic kext patcher \(neue Grundlage für AppleALC 1.1.x und Shiki 2.x.x\)](#) into /Efi/Oz/Darwin/Extensions/Common/ and thats it sound should work afterwards.
