Ozmosis problem with ASUS MAXIMUS VII FORMULA

Beitrag von „Fredde2209“ vom 25. April 2017, 20:33

pfuuuh... I have absolutely no clue, why that one doesn't work, but you may try the attached one. For your audio codec, I need to tell you something... It is not possible to use the AppleALC yet. Fortunately, I know how to transform a patched AppleHDA into an AppleALC Kext. At least I hope so... I did it for 3 times now and it worked pretty good, but I can't guarantee, it will work. I will try my best, but it may take some time.
