Ozmosis problem with ASUS MAXIMUS VII FORMULA

Beitrag von „Fredde2209“ vom 25. April 2017, 20:47

But thats a Z97 Board and I think, this might be the problem... Maybe this is not exactly your board and you just took the wrong Bios?

EDIT: Sorry, hab da was durcheinandergebracht...

Sorry, wasn't your fault, I mixed something up, with the last post in the Ozmosis Request Thread! 😊

EDIT2: Okay... you can try this one 😄 But still, the audio codec is the same 🤔 do you know the codecID of your CS4398 Codec by any chance?
