## **Die letzten Schritte ... (Sierra mit Ozmosis auf GA-Z77X-UP5 TH)**

**Beitrag von „griven“ vom 29. April 2017, 20:50**

I depends on the way Windows was installed...

I guess it is a legacy installation instead of UEFI. Please open op a Terminal in OS-X and use this line do disable OZ Boot entry Filter:

Code

```
1. sudo nvram 1F8E0C02-58A9-4E34-AE22-2B63745FA101:DisableBootEntriesFilter=%01
```

after a reboot you should be able to boot windows again.
