## Imessage and Face Time in Ozmosis

**Beitrag von „kuckkuck“ vom 1. Mai 2017, 18:23**

You need to write a defaults.plist and put it into the folder EFI/Oz in your EFI. Templates can be found here: [https://www.hackintosh-forum.de...OzmosisDefaults-Vorlagen/](https://www.hackintosh-forum.de/forum/thread/31905-ozmosis-defaults-vorlagen/)

But remember, you need to change the injected values with values from CloverConfigurator for example. You can also modify and generate a defaults.plist with the OzmosisToolbox from our download center. [Auslesen der Ozmosis-Parameter](#)
