## **Ozmosis problem with ASUS H97M-E and macOS Sierra**

**Beitrag von „whfengmd“ vom 4. August 2017, 20:04**

It is so kind of you to have such a quick response! Thank you very much! I think the dedicated Defaults.plist for the gtx card is more important than the audio. Would you please give me both the defaults.plist(will be put in OZ) and the DSDT together? I can mount the efi disk with no problem.

Have a nice day!

wh

Here is a defaults.plist downloaded in our forum.Do you think it is ok to put in the OZ file to support the gtx card working under Nvidia WebDriver?
