## Lenovo E560 - Clover - EL Capitan

Beitrag von „Web Developer“ vom 30. August 2017, 21:29

[Zitat von iPhoneTruth](#)

Try this EFI-Folder. Do not edit something in the config.plist.

This EFI-Folder ist only for Installation. After Installation use my CLOVER-Folder from post 207.

[@Web Developer](#) I deleted the wrong config.plist. Pleas use thist EFI-Folder

Ok, I install macOS successfully with the congif.plist in the attachments, but when I use CLOVER-Folder from post 207 it take long long time and when I use -v flag it shows me this message "AppleLPC: RCBA not enabled"

[@iPhoneTruth](#) maybe your DSDT will not work for me because I have 6200U cpu?
