

Ozmosis BIOS Guide - individuelles Anpassen & Erklärung des Aufbaus

Beitrag von „crusher“ vom 6. Oktober 2017, 23:56

Explain how to work apfs for high sierra. How to work apfsjumpstart. Many user say does not see apfs prtition after reset nvram then we must use later shell for boot HS. But users of Ozmosis driver I can say wait to developer fix apfsjumpstart very soon until then use hfs+ format.

Good luck.....

[@kuckkuck](#) nice post. 😊
