## **Updating from Yosemite - Computer frozen**

**Beitrag von „fborensz“ vom 12. November 2017, 20:17**

That sounds nice ! I'll be able to check it as soon as I'm home. I'll keep you updated 😊

EDIT : I put the dsdt on the Load folder as you suggested, but I can't boot my computer anymore 🤔 stuck at loading with the Apple logo

EDIT 2 : I didn't find any solution for now. It won't even let me boot on my bootable drive to make a clean Sierra Install. Can't access to anything 😞
