## Acer Swift 3

**Beitrag von „domeej“ vom 13. November 2017, 14:47**

Does it work now? And do you had to change something in BIOS to enable the Network Card?

Problem is I couldnt enter the core settings in BIOS because they are disabled by the manufacturer and now I'm not sure if i should try the Broadcom-Card.

Right now i got a Wifi Dongle but it doenst work on WPA2 Enterprise Networks....

greetings
