

Anleitung: High Sierra auf HP Elitebook 8460p mit Intel Core i7-2620M und ATI HD 6470M

Beitrag von „OptimusPeter73“ vom 20. November 2017, 15:21

Ok, I have it! All works. In the screens is what I had to change:

using AMDFramebufferUtility.

I had change fbname to Hydrilla and update Clover to newest version. And I installed whatevergreen.kext and newest lilu.kext.

Thank you so much for help G4_Hacker! I can work in laptop with MacOS now.
