Hp 8470p Fixes!

Beitrag von „pole“ vom 16. Januar 2018, 00:42

I see and agree with you.

I found this in the forum:

[HP EliteBook 8470P High Sierra 10.13.1 Installation](#)

Exactly same device and Bt.modul, same IDs, but I don't know what Wifi card he uses.

I think the kexts issues was because of the nullpowermanagement.kext.

I'll try it later.

Kexts:

I was looking for what several times, which kexts do I need it.

Is it right, which is in the folder.? (attached)

(Except, FakePCIID's kexts and voodooosdhc and voodooohda ('cause AppleHDA)

Which one should be in /Library/Extensions and which in /Volume/Efi?

Thank you! 🙏
