Erledigt Mac Pro 2009 upgrade

Beitrag von „igorjos" vom 23. Januar 2018, 18:07

As I said, I'm posting benchmarks of Samsung SM951 AHCI 256gb M2 2280 PCIe SSD which connected to the third PCI port with cooling version of adapter.
Running on a Mac natively (no kexts or patches applied) in APFS
Bought used about 110 euros with postage from ebay.
This ssd was removed from a Lenovo ThinkPad X1 Carbon (Gen 3)
Part number: MZHPV256HDGL-000L1
If you buy Samsung version with part number MZHPV256HDGL-00000 then i think you get read/write speed of 1400 MB/s
