Installation OSX 10.13 auf Asus Z370

Beitrag von „Altemirabelle“ vom 28. Februar 2018, 14:23

Na ja. Richtig wäre:

Exit → Load Optimized Defaults : Yes

Advanced \ CPU Configuration → Intel Virtualization Technology: Enabled

Advanced \ System Agent (SA) Configuration → Vt-d: Disabled

Advanced \ PCH Configuration → IOAPIC 24-119 Entries: Enabled

Advanced \ Onboard Devices Configuration → RGB LED Lighting → When system is in sleep, hibernate or soft off states: OFF

Advanced \ AMP Configuration → Power On By PCI-E/PCI

Advanced \ Network Stack Configuration → Network Stack: Disabled

Advanced \ USB Configuration -> Legacy USB Support: Auto

Boot → Fast Boot : Disabled

Boot → Secure Boot → OS Type : Other OS
