[@influenist](#) you can use the EFI Confi. from here: <https://github.com/Ivan1500/Xiaomi-Air-MacOS>. With clover config mount your efi partition, delete CLOVER folder and paste the downloaded folder. And for the brightness you need to install [Karabiner](#) to remap your keys.

Download it from here: <https://github.com/Ivan1500/Xiaomi-Air-MacOS/releases>
