High Sierra auf Acer Aspire 5755G möglich?

Beitrag von „DSM2“ vom 24. März 2018, 10:57

Hat dir [@al6042](#) nicht genau von dieser abgeraten ?

Die Dell DW 1701 ist unsupported!

Wer nicht hören will, muss manchmal einfach fühlen.

Thought it would be useful to try and provide a recap of what is supported, what isn't, if it works OOB or if it does not, for which OS X version, etc.

I invite everyone to bring his/her own contribution and it'll be added to the list. This post will be updated as contributions come along in order to keep the list under control. Hardware specifications can be verified here: http://wikiibexl.com/wiki/Main_Page

Unsupported:

Vendor	Model	Format	Ver-Dev	Chip	Rate	SL	L	MG	Mo	Tr	Co	SI	SS	GPU	Rest (driver)
