Hilfe !!! USB 3 - GA-Z87X-UD7 TH - ozmosis

Beitrag von „griven“ vom 18. April 2018, 00:34

Possible? Definitely yes but it's not an OZ Issue at all...

There are different solutions around to overcome Apples USB Limitations in Sierra or HighSierra some rely on Kext Patches to remove the USB Port Limits others rely on Kext Solutions to define witch ports should be used and which not. Pick the solution wich fits your needs since there ist no one in all solution which will fit to all given Hardware.
