## **Nach Sleep -> Restart zum Bios / Dell Optiplex 9020**

**Beitrag von „shatterhenner“ vom 18. April 2018, 23:41**

Hi, sure i can share u my efi folder!!!

Im at work at the moment, i can upload it tomorrow.

Your optiplex is sleeping correctly under high sierra with p and c states enabled via clover?

This is the ssdt im currently using for working powermanagment
