## **Neat Video Performance**

**Beitrag von „matt82“ vom 26. April 2018, 20:35**

Hier mal die Antwort vom Neat Video Support Team...

*"Dear Matthias,*

*thank you for the message.*

*That may be caused by the drivers created for those GPUs by Apple. The current drivers seems to be slower than the drivers on the Windows side. The same Vega GPUs are consistently faster in Windows than in OSX according to our tests so far. We think that is caused by the drivers in OSX.*

*That leaves a chance for improvement by Apple and we are hopeful.*

*Thank you,*

*Vlad*
