Lenovo Ideapad 500-15ISK i7 6500U 2,5GHz 12GB RAM Intel HD520 macOS High Sierra / Catalina BETA

Beitrag von „destroyer1“ vom 1. Mai 2018, 08:22

Hi to all,

I'm a newbie..I would like to install high Sierra on my Lenovo 15ISK with i7 Radeon and 2 tb of hdd.. could someone tell me how to set clover to start install?

Normal I use... Kext dev model=1 rootless=0

Usb ownership.. usb injection..fake CPU I'd 0x000106e0...won't start..

Someone help me??? Thanks!
