Does Oz understand Xeon CPU's and how to make it work?

Beitrag von „firefly_can_fly“ vom 2. Mai 2018, 18:25

Well, the main question is in there.

Recently i could not make Xeon E3 1245v3 under Oz, so i moved to clover for some time.

But on the other side, i didn't managed to find the answer and I'm not even close to engineer level of understanding how it works.

Maybe someone had experience of making it work, so please, guide me or educate 😊

Current config is:

Intel Xeon E3-1245v3

GA-Z97X-UD3H (rev 1.1)

MSI GTX 1050Ti Gaming X
