Trailer werden abgespielt.

OK, dann könnte folgendes das Problem sein:

[Zitat von FAQ](#)

Is my computer banned?

If you are able to view the trailers but bought movies do not play even after computer authorisation your NIC MAC might be banned. Sometimes it is possible to log out and reauthorise your computer after a short while. Otherwise you must change your LAN MAC address. Check System configuration FAQ for libHookMac usage details. If it helps you consider flashing your ethernet card with a different MAC (or using other ways to change it).
