Installation of Mojave with Ozmosis using HD 4600

Beitrag von „al6042“ vom 14. Juni 2018, 22:46

Did you also add Lilu.kext and IntelGraphicsFixup.kext into /EFI/Oz/Darwin/Extensions/Common, plus the "-lilubetall" boot-arg in your Defaults.plist? Don't forget to use the "Alt+WinLogo+P+R" key combination to reset your NVRAM and load the changed local Defaults.plist.
