macOS Mojave Ozmosis BETA – OZ167X-XMAX

Beitrag von „kuckkuck“ vom 22. Juni 2018, 18:17

Boot into an available OS like Recovery/Sierra/High Sierra/El Capitan or boot your Install-Thumbdrive. Then select systempreferences or the right app (in the Install-Menu) to choose your startup-volume. There you should be able to see the installed Mojave OS. Select it and reboot, there should be a new startup entry in the bootmenu. This specific boot entry should also be NVRam-Reset persistent, at least in 2 out of three cases I witnessed or heard about...
