Hi [@mt-fr](#),

Patch in picture are for Mojave. Here are the High Sierra patches.

I can only test that with my HD-620. But if you have luck the patch works also with the HD-630.

Sorry, second patch is High Sierra. Thus, this patch not work with the HD-630.

Hi [@mt-fr](#) again,

Here's a guide on how it works. For the HD-630 it is the same way. You have to find the right place for patching in the AppleIntelKBLGraphicsFramebuffer.
