Erledigt **Oz Gi-Z77P-D3 Alc887 soundcard don't work**

Beitrag von „al6042" vom 5. August 2018, 11:21

Only for older versions.

They had a plugin-kext inside, which would lead to a kernel-panic with Ozmosis.

Therefore you had to use the merge_pinconfigs.sh from the Tools-Directory of the github ressources to merge the plugin-kext into the original AppleALC.

This step is obsolete since AppleALC version 1.2.5 from April 2018.
