[Sammelthread] macOS Mojave 10.14 Developer Beta - Erfahrungen

Beitrag von „Politic“ vom 14. August 2018, 16:25

[quote='al6042','Und der 15-Port-Limit-Patch funktioniert auch noch. [/quote]

In Graphics / ig-platform-id / I have 0x19120000. Optimal for HD530.
In the SMBIOS system, iMac14.2 chose the Intel Core i5-4570 @ 3.20 GHz.
Is this the ideal setting for a 24-inch full HD monitor?

I see you have the same Graphics Card and i5 processor and you have another iMac setting.
