`Erledigt` macOS Mojave Ozmosis BETA – OZ167X-XMAX

Beitrag von „nrchandar0100" vom 17. August 2018, 15:10

HI,
One good news. After installing the latest ozmosis rom provided by you i started booting the os installed on my M2 SSD. The ozmosis boot screen is seen but no bootable drive was there . the ozmosis screen was totally plain, nothing on the screen. I decided to use another normal HDD on which
High sierra installed on os x extended file system. To my surprise the os mac high sierra booted just few minutes back . the bootable ozmosis screen shows the normal hdd and it does not show the M2 SSD. but after booting high sierra on the desktop i can se the SSD partitions whatever i created. the is the really good news for your effort . but some thing some where is wrong with regard to M2 SSD.
Thanks and Regards
nrchandar0100

NOTE. in the ozmosis booted high sierra i have placed lilu and whatever green kexts along with Voodoo HDA kext but no audio
