Please enter all your Hardware Details in your profile.

Also you have to adjust your [BIOS settings!](https://www.hackintosh-forum.de...tallationsvorbereitungen/)

Please try to install macOS without these Kexts. Remove Kexts like Legacy.kext or PCGenRTL8.kext!

I don't need your TeamViewer ID, thats just an information in my signature thats displayed under every Post...

You can also try this ROM:
