Black screen with grey square when boot with installer. Asus Maximus VII Hero

Beitrag von „kuckkuck“ vom 29. August 2018, 22:36

Couldn't take a look at you ROM yet but looks like a GUI problem to me...

Probably my OzmosisHFTheme has problems with your 21:9 monitor. Implement the OzmosisHorizontalTheme into your BIOS instead of the OzmosisHFTheme, then you shouldn't get that square.

You can also press F12 during Boot to get to the bootmenu and then select your install thumb drive there, then you shouldn't have problems either.
