turn off hd630 and only use gtx1050

and i have mac os 10.14 after use new kext i can see gtx in graphic tab! (i haven't nvidia web yet)

MR. in images i send 3 images for ---> how can i install

- Intel Gaussian Mixture Mode
- Apple Intel Thermal Subsystem
- Intel SMBus Controller

?

for fan ==> only control in windows can you use windows data to set fan in mac ?
