High Sierra mittels Clover auf Gigabyte H370M D3H GSM installieren

Beitrag von „chippackage“ vom 5. Januar 2019, 23:19

My sleep works perfect, I can have it on sleep for a full day and it does not reset. I did have issues before but I have replaced the OsxAptioFix2.efi with OsxAptioFix2Drv-free2000.efi and now it supports sleep.
