## **AORUS PRO Z390, i9 9900K, Radeon Vega56 - Reboot nach dem erstem Login nach der Installation**

**Beitrag von „Beppo68“ vom 12. Januar 2019, 17:14**

I've done no overckocking.

Memory setting of XMP is very defensive. My BIOS setup was is done by resetting to default and then doing the normal hackintosh settings. The temperatures of the health monitor is about 30...
